- ★ Practice section allows the student to choose the problems they want to work on and they can print a report with those problems they miss
- ★ Target Grades 3 - and up
- ★ Appropriate for all ages 7 & above
- ★ Excellent for Remedial Students

The Games of Math

Learning multiplication facts and related lessons is now a truly exciting game. Students begin at the appropriate level: beginning, intermediate or advanced. There is a practice section to work on specific multiplication problems. Then the student builds skills while playing challenging games such as; baseball, long jump, ballooning, basketball, skiing or bowling. Each of these games is engaging and fun with 11 levels of play. The objective is to complete each level and earn the gold star certificate while building multiplication skills and fluency.

The Practice

In our practice area, students can pick the problems they want to work on, then they can select a 1 minute, 2 minute, 3 minute or 30 question test. At the end of the test, the problems they missed can be printed and they can retake the test with those problems.

Pre-Test and Post-Test

A Pre-test and Post-test helps track the progress of each student and class. Easy-to-read student and class reports can be printed from the student management section.

PC and Mac compatible

Games of Math 3 - Multiplication is PC and Mac compatible.

System Recommendations:

Windows XP, Vista, or 2000 (SP4)
300 MHz or higher processor, 64 MB RAM or higher

Guaranteed

Games of Math 3 - Multiplication comes with a 90 day - 100% satisfaction guarantee.

Designed for Students Age 7 and above

Featuring young adult characters and sports games to engage students in math games that will appeal to elementary, middle school, high school and adult students. It is especially appealing to students who require lots of action and activity to keep their attention.

Motivation and Tracking System

The Help Me 2 Learn - Super Star Progress, Motivational and Tracking System

Our Super Star Progress Graph, Motivational and Tracking System is designed to keep students engaged and motivated. Students choose the appropriate level to begin. Their goal is to complete each level in each game (lesson) to move up the levels to complete level 12 of each game. They are rewarded with a gold star and a certificate of completion for that game. If they earn a gold star in all 6 games, they are rewarded with an overall gold star and certification of completion for the program.
